

Problem Set 0, Problem 0

1. Select *File->Make a copy...* and save a copy of this template to your Google Drive using the name **ps0pr0**.
2. Type your response to the reading below.

What was the most interesting or important idea in this article for you – and why?

Since I am considering a dual degree program in Computer Science and Graphic Design majors, I was interesting in how the process of making a program just like a watercolor painting. For every graphic designer, I think it would be a dream to make a watercolor painting with a computer program. Ever since this program, now they do not have to carry around their whole art material to create their artwork. Also, one who is majoring in computer science, I love the idea of making programs easier for neophyte users. Even for me, I do not know many program yet, so I had trouble with learning graphic design tools. I guess it was not meant to be for beginners, you have to master at least one other tool to learn many different tools fast. After I read this article, It inspired me to design user-friendly software UX and actually create what i design for users later on for my job.

3. Once you are done with your response, choose *File->Download->PDF document*, and save the PDF file on your machine. The resulting PDF file (**ps0pr0.pdf**) is the one that you will ultimately submit.
